

# Forced Entry 15 Sound & Bullet 8

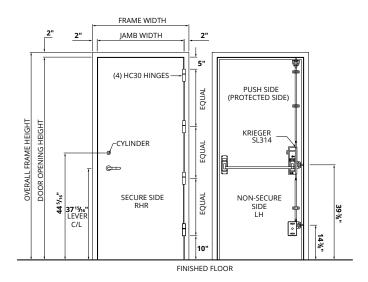

Model: FE15-BR8-STC50

Krieger's industry-leading forced entry (FE) hybrid door features a trio of special purpose performance—FE, bullet, and acoustical protection.

First, it is tested to the new SD-STD-01.01 Forced Entry and Ballistic Resistance Standard—and exceeded the 15-minute test twice.

The UL 752 Level 8 bullet rating means the doors can stop up to 5 shots from a 7.62 mm high-powered, sniper, or tactical rifle. Plus, it provides an STC 50 acoustical rating for sound control.

Every Krieger premier special purpose door is custom manufactured to meet your exact specifications for size, style, finish, and performance.

### **Premier Custom Finishes**

Our full range of custom finish options includes prime painted, wood veneer, stainless steel, specialty finishes, and more—all perfectly matched to complement your project.

### **Details**

#### **Tests and Certifications**

- Successfully tested and rated to 15 minutes per SD-STD-01.01 Revision G. The hinge edge was tested up to 30 minutes, and the rest of the door assembly resisted laboratory attack efforts by a six-person team for up to 75 minutes.
- UL 752 Level 8 bullet rating can withstand 5 impacts of 7.62 NATO (.308 150 grain) rifle ammunition shot at 3025 maximum FPS.
- STC 50 acoustical rating ensures professional, commercial quality sound control. Frame grouting is not required, can be filled with 8# density mineral wool insulation.

#### **Door and Frame Construction**

- 12-gauge stainless steel frame comes standard with a  $^{5}/_{16}$ " thick factory-welded, nondirectional finished threshold.
- Option for ½" thick threshold is available.
- 14-gauge door skins come standard to form a 2 ½" thick armor-core door panel with robust internal reinforcements and a surface-mounted steel security astragal.

#### **Door Sizes**

 Krieger can design and manufacture FE hybrid doors in standard and custom sizes, including oversized doors.

#### Fire Labels and Positive Pressure

• Smoke Labels: Up to 20 minutes

#### Hardware

- Krieger SL314 self-latching, multipoint exit device combines security with easy access. Complies with NFPA 101-Life Safety Code and closes on its own for added security.
- SL315 option is available for an emergency lever configuration.
- Krieger HC30 Cam Lift Hinges are Grade 40 as tested to ASTM F476. Hinges are recommended to be ordered with optional security pins to enhance the openings security.

#### Security

 Reverse-handed assemblies are recommended for maximum security.

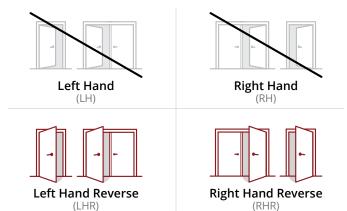

#### **Finishes**

 Krieger's custom finish options include prime painted, wood veneer, stainless steel, specialty finishes, and more—all perfectly matched to complement your project.

# **Door Handing**

### Reverse handing is required on FE models to ensure the door conforms to the standard.

- Double doors must have a removable mullion.
- If your project requires regular handing, contact us, as regular handing will not achieve the desired rating.

# **Optional Add-Ons**

### **Specialized Hybrid Performance**

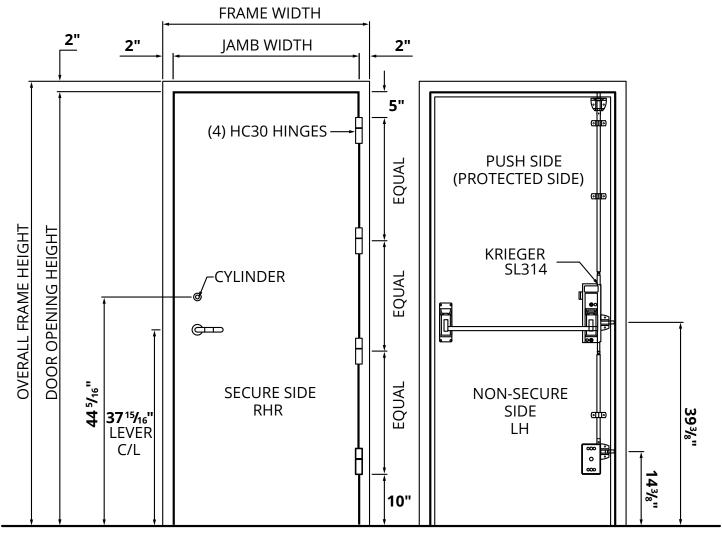

Krieger's FE hybrid doors can be configured with optional add-on features and different ratings to meet your specific performance needs.

- Acoustical & SCIF
   Add up to an STC 55 rating and SCIF Sound Groups 3 and 4.
- Bullet & Forced Entry
  Enhance door security with an ASTM F476 Grade 40 label.
- Blast & Pressure
  UFC 4-010-01 and UFC 3-340-02 certifications are available.
- Radio Frequency
  Get RF shielding of 40 dB or 60 dB for TEMPEST facilities.
- Tornado & Hurricane Can comply with FEMA P-361 (tornado) or FEMA P-320 (hurricane).
